ReprodutorMusical

+ field: Interface

+ method(type): tocar (void)

+ method(type): pausar (void)

+ method(type): selecionarMusica (void)

AparelhoTelefonico

+ field: Interface

+ method(type): ligar (void)

+ method(type): atender (void)

+ method(type): iniciarCorrerioVoz (void)

NavegadorInternet

+ field: Interface

+ method(type): exibirPagina (void)

+ method(type): adicionarNovaAba (void)

+ method(type): atualizarPagina (void)

ReprodutorMusicalImpl

+ Classe implementa ReprodutorMusical

+ method(type): tocar (void)

+ method(type): pausar (void)

+ method(type): selecionarMusica (void)

AparelhoTelefonicoImpl

+ Classe implementa AparelhoTelefonico

+ method(type): ligar (void)

+ method(type): atender (void)

+ method(type): iniciarCorrerioVoz (void)

NavegadorInternetImpl

+ Classe implementa NavegadorInternet

+ method(type): exibirPagina (void)

+ method(type): adicionarNovaAba (void)

+ method(type): atualizarPagina (void)

Iphone

+ Classe estende ReprodutorMusicalImpl, AparelhoTelefonicoImpl e NavegadorInternetImpl

+ method(type): tocar (void)

+ method(type): pausar (void)

+ method(type): selecionarMusica (void)

+ method(type): ligar (void)

+ method(type): atender (void)

+ method(type): iniciarCorrerioVoz (void)

+ method(type): exibirPagina (void)

+ method(type): adicionarNovaAba (void)

+ method(type): atualizarPagina (void)
